

Research Application Form

We evaluate research proposals based on the following general criteria:

- The research design and method is sound and will result in data in which there is a high confidence level.
- The research makes an important contribution to the body of knowledge on organizational culture and/or personality theory.
- Is the data sample large enough to support the research?
- Can you demonstrate that the effect being measured is a result of the research intervention and not other random effect?
- What is the likelihood that the research can be published? Where might it be published?
- If your research design and method include the use of other measurement instruments, your proposal should describe these other tools and how well-established they are psychometrically (reliability and validity).

Please fill out the application form with your biographical data, description of the proposed research, attach a copy of your resume or CV, and e-mail these documents to elin@breckenridgeinstitute.com.
